

## THE LIQUOR BILL.

The bill that had passed the Senate for the suppression of the sale of liquor for drink has been passed by the House. There was a majority for it on the final vote.

It contains a provision, it is understood, referring it to the people for their acceptance or rejection.

Later from Havana—Arrival of the Crescent City.

The steamship Crescent City arrived at New York at quarter past 3 Monday morning from Havana, having left that port on the 15th.

The C. C. arrived off the Moro Castle on the 16th inst., after sunset, and had to remain outside until the next morning. After entering the port, to which no objection was made, the captain of the Port came alongside, and informed Captain Davenport that all persons on board could land, except purser Smith.

Upon Capt. Davenport expressing himself pleased at the termination of the difficulties heretofore existing, the Captain of the Port assured him it was only for this trip; but should Mr. Smith return in the Crescent City, no communication with the shore would be allowed. Capt. D. expressed his regret at this determination, and remarked that the difficulty was becoming more complicated by this measure; and that although it might be right to exclude any individual from the island whom the authorities might consider prejudicial to its authority, which was not denied, he could not concede the same right to the Captain General to prohibit the entrance of passengers and the mails, simply because one person on board was obnoxious to his Excellency. To this the officer made no reply.

On the eve of sailing, Capt. D. received a note from Messrs Drake & Co., enclosing a copy of one to them from Martin Galiano, political secretary of the Captain General, copies of which will be found below.

**POLITICAL SECRETARY'S OFFICE, HAVANA.**  
GENT.—Notwithstanding there remains in full force and vigor, an order of His Excellency the Governor and Captain General, which I communicated to you on the 4th of September last, relative to the being forbidden that Mr. Smith, an employee on board the American steamer Crescent City, should return to the island; and also forbidding the entry of the said vessel in this port, should she convey him, as a special concession made by his Excellency, on the last voyage made by said vessel to New Orleans, and on her return to this port, which she has effected on day, might be interpreted in a doubtful manner, it being a concession founded on special reasons, of which his Excellency the minister Plenipotentiary of Her Majesty at Washington has knowledge; his Excellency instructs me to say, that in future the said order will be enforced, so that being informed of this particular, you may communicate information to whom it may concern, and thereby avoid that, through bad intelligence third parties be informed. MARTIN GALIANO.

**U. S. MAIL STEAMSHIP (CRESCENT) CITY, HAVANA, November 16.**  
GENTLEMEN:—I am in receipt of your favor of this date, enclosing an official letter from the Secretary of the Captain General, by which I learn that this ship will not be permitted to enter this port on her return from New York, should Mr. Smith be on board.

I was in hopes this matter was settled. However, I can assure you that Mr. Smith will return in the ship, and the consequences, whatever they may be, the Spanish authorities will be answerable for.

H. R. DAVENPORT, U. S. N., Commanding Crescent City.

From the London Morning Chronicle Oct. 21.

**Shocking Death from the bite of a Serpent.**

Yesterday morning, the employees of the Zoological Society, engaged in tending the animals in the Zoological Gardens, Regent's Park, were greatly alarmed and excited, consequent on the following shocking and fatal occurrence to one of their colleagues: It appears that at the time above mentioned, Frederick Garlin, one of the establishment devoted to the reptile species, entered the large cage containing the serpents, with a view of stirring up some birds which had been placed therein as food for the serpents, the time having arrived when some of them had recovered from their torpid state, consequent on their previous meal. Garlin was in the act of picking up one of the birds, when one of the species of Indian snakes, known by the name of the "cobra," and the most venomous of the tribe, made a sudden dart at the face of the unfortunate keeper, and fixed its fangs on the right side of the nose.

The screams of the poor man attracted the instant attention of William Cockbridge, another keeper, who was in the cage at the time, and he rushed to the reptile case and drew his companion out. The reptile had immediately after his bite, relinquished his hold; but the effect was such that it instantly swelled up the face of the poor fellow and afflicted him with immediate blindness of both eyes. An alarm was raised, and assistance having been procured, Garlin was once placed in a cab and conveyed to University College Hospital. By this time, although a short period had elapsed between the bite and the arrival at the Hospital, the head and face of the keeper had swelled to an enormous size. The patient was instantly taken charge of by Dr. Burdett, the resident surgeon, and the entire medical staff then in attendance. He complained of pain in the throat and stoppage of breath. Artificial respiration, galvanism and every means which medical science could suggest was resorted to, to sustain life and alleviate the sufferings of the patient, but so rapid did the venom extend itself through the entire system, that in sixty-five minutes from the unfortunate man's admission to the hospital he was a corpse having died in the most excruciating agony. The body awaits a Coroner's inquest, and there is no doubt, if the authorities of the Zoological Gardens have not already done so, that the jury will order the immediate destruction of the reptile. Garlin was a fine young man, 30 years of age.

Mary Burr, the last of the Punksag Indians, died at Canton, in Massachusetts, on Monday, aged 101 years. There are many half and quarter bloods of that tribe, but none of full blood. The deceased, many years ago, married a colored man named Lenore

Burr, and many of their children and grandchildren are living in the State. At the time of her death, she drew a pension from the U. S. Government, in consequence of services rendered by her husband in the revolutionary war. Eliza Williams, a sister of hers, died at Stoughton, four years since, aged 101 years and 1 month. Another sister, Hannah Nuff, died at Canton, a few years since, at the age of 99.

## DREADFUL CATASTROPHE.

## Four Men Smothered to Death.

By a slip from the Worcester Transcript, we learn that a dreadful catastrophe occurred in that city Monday morning, resulting in the death of four persons. The Transcript gives the following account of the sad affair:

"At half-past 12 o'clock this morning a fire broke out in the Worcester County House, in this city, by which four lives were lost. The fire occurred in the new north wing of the prison, and in the basement beneath the lower tier of cells where the furnace is located. It was communicated to the air box of the furnace, and thence to the surrounding work. The fire department was on the ground as soon as the alarm could be given, and succeeded in preventing the fire from communicating to other portions of the prison. Before any thing could, however, be done to arrest the flames, or release the persons in confinement, the smoke and heat ascended through the iron gratings to the cells above, the doors and fastenings of which had become so much heated in consequence, that it was impossible to open them. Capt. Lamb, the architect of the prison, was sent for, and succeeded in removing some of the fastenings, so that the doors were forced open as speedily as possible, but not till four insane men had been smothered to death by the dense smoke and heat which poured through the gratings into their cells. In the several tiers of cells in this wing, there were in confinement 5 men, 24 women, of whom had an infant child. Fourteen of the women were in confinement for various offences; the other 10 women and the 5 men were insane persons who had recently been removed to the prison for safe keeping, in consequence of the special reasons, of which his Excellency the minister Plenipotentiary of Her Majesty at Washington has knowledge; his Excellency instructs me to say, that in future the said order will be enforced, so that being informed of this particular, you may communicate information to whom it may concern, and thereby avoid that, through bad intelligence third parties be informed. MARTIN GALIANO.

Thomas Downes, of Worcester, aged about 40.

James Fitz Patrick, Irish, aged 50 or 60; had been in the Hospital since 1846.

Bucklin A. Duches, of Rhode Island, aged 47, a carpenter, had been in the Hospital since 1845.

Such in brief are the particulars of this shocking catastrophe, for the occurrence of which we are happy to say no blame can be attached to the Keeper of the Prison, or his Assistants.

Cummings who was found guilty of the murder of his wife, at Bath, a few years since, and sentenced to be hung, and whose sentence was subsequently commuted to imprisonment for life, is at this time rendering the State good service at Concord. Several efforts have at different times, been made to procure his pardon; and at the present session of the Executive, a more powerful and concentrated effort than ever before being made to effect the object. What the result will be time only can determine.—Haverhill Republican.

The fact that the American Colonization Society intended sending out one hundred and seventy-five colored emigrants in a vessel which was to leave Norfolk, Va., on the 4th inst., being announced, the number of applicants has increased, until there are four hundred and eighty, of whom the largest portion are from Virginia, the rest being from North and South Carolina. One hundred and twenty-five are from Norfolk and its vicinity. The Company, having actually promised passages to as many as 350, is now preparing to send out two vessels, one of which will leave Norfolk on or about the 13th inst., and the other, Wilmington, N. C., about the 20th.

**PRAIRIE FIRES IN MINNESOTA AND WISCONSIN.**—Very destructive prairie fires raged during the latter part of the last month in various parts of Minnesota and Wisconsin. Nearly all the way in some sections has been swept away, as well as large quantities of provisions of various kinds, fences, stables, &c. A very hard winter is anticipated. Supplies are very high and money not to be had. A letter from Stillwater says:

"Mr. Doe, a teamster in the employ of Mr. Fox at the Falls, had gone to the meadow with a wagon and a yoke of oxen for hay; after he had loaded, he discovered the fire coming, and before he could escape he found himself surrounded by flames. He unhitched his oxen from the wagon, and holding on to the bow of the high ox dashed through the flames, which he says were twenty feet in height.

**THE GREAT MISTAKE OF HIS LIFE.**—We take the following from the New England Farmer, published at Boston—a source which entitles it to great credit.

"We learn, on reliable private authority, that Mr. Webster confessed to a warm political friend, a short time before his death, that the great mistake of his life was the famous 7th of March speech, in which, it will be remembered, he defended the fugitive slave law, and fully committed himself to the compromise measures. Before taking his stand on that occasion, he is said to have corresponded with Prof. Stuart and other eminent divines, to ascertain how far the religious sentiment of the North would sustain him in the position he was about to assume."

A farmer in Canton, Mass., has a cranberry meadow of twelve acres from which he has raked the present season, upwards of 1000 bushels of fine cranberries, for which he has realized \$3000 cash.

## OATS, HAY, &amp;c.

There has been a recent rise in the price of oats in our vicinity. They sell for 42 cts. a bushel; hay is worth \$10 or \$12 per ton; and indeed everything affected by the drought is high. Pork (whole hogs) is worth 77; good hogs 8 cts per pound. Butter—first rate—sells for from 91 to 93 cts.

[Speaking of butter reminds us of a general complaint. Most families who contracted their butter for the season for a shilling a pound when the price was but 15 cts, find that the drought dried up the cows amazingly early—very soon after the price rose to 90 cts. It was found that the cows would not give down these circumstances no more than the man's hens would lay eggs at 10 cts a dozen; yet it is known that some such cows did give down to make butter to sell at the higher price to other persons beside those contracted with.] Beef is "dog cheap" and poor at that, with exceptions—worth from 24 to 44 cts by the quarter, according to quality.

Turkeys sell for 8 & 9 cts—and thanks-giving week were plenty enough, and generally lank and lean; but luckily for our friend Mr. Alexander Miller, of Barnet, brought us one for Thanksgiving, the finest and fattest we ever saw. Thanks to him. He doesn't think the printer ought to live on bones, while other people are thriving on the fat of the land.

The Vermont Legislature adjourned Wednesday morning.

We notice with pleasure, among the aides de camp appointed by the Governor, the name of our estimable townsman, Mr. now Colonel Geo. A. Merrill.

## THE LITERARY INSTITUTE.

The Course of Lectures before the Institute, for the Winter, will commence on Wednesday, early in December. The list of Lecturers for the season is now nearly completed—the managers having engaged the services of several of the best writers and speakers in New England, among whom are:

President Smith of the University of Vermont; President Lord of Dartmouth College; Prof. H. C. Porter of Middlebury College; Rev. E. C. Lawrence of Marlborough, Mass.; Rev. J. C. Smith of St. Albans; Hon. F. H. Johnson, of Brattleboro; Rev. A. H. Chapin, of Brattleboro; Chief Justice Gilchrist, of New Hampshire. Tickets for the Course will be for sale early next week at Mr. Howard's Bookstore, and the St. Johnsbury House. They can also be had of the subscription committee. Price of Tickets:—For the Course, admitting family, \$1.50; do, do, gentleman and lady, 1.00; do, do, single, .75; For single Lecture, .12.

**OFFICERS FOR THE YEAR.** Managers—S. G. Clapp, A. G. Clapp, W. B. Hale, Noah Eastman and J. H. Paddock, Secs.

Secretary—William B. Hale; Treasurer, Noah Eastman.

Subscription Committee—Geo. A. Merrill, John H. Paddock, T. M. Howard, P. D. Bissett, and E. Brown.

**EROTIC.**—From Europe our dates are to the 6th inst. The British Parliament met on the 4th, but a trial of the strength of the parties was not expected before the 11th inst.

Severe storms the last week in October caused immense loss of property and life on the British coast.

The French Senate met November 4th, for the purpose of settling the preliminaries for the establishment of the Empire. About all the public know is that ten members voted that the people should be consulted. M. Fould, Minister of State, declared that the Government did not oppose the proposition, which was then referred to a special committee, whose report would be presented on the 6th.

P. S. An arrival three days later announced the establishment of the Empire in France, and Louis Napoleon Emperor, with the title of Napoleon 3d.

## News Items.

The great Telegraph case of F. O. J. Smith vs. Amos Kendall and others, has been decided in favor of the complainant, Smith. The amount of interest at issue in this case is said to amount to upwards of half a million of dollars.

In the New York Board of Aldermen, on Friday evening, the bill granting leave to the party known as the Omnibus party to build a railroad in Broadway, was passed by a vote of 15 to 4.

Silas Metcalf, Esq., a resident of the town of Newport, N. H., in a fit of insanity, committed suicide on Tuesday morning last by hanging himself.

The Siamese twins, Chang and Eng, are the owners of a large number of slaves in North Carolina, and are said to be very severe task masters. They are married, and what is singular, Chang is said to be a Pierce and King Democrat, and Eng is something of a Hale Abolitionist. The former has six children, and the latter five. Eng's wife weighs 220 pounds, while the aggregate weight of the twins is but 219.

The following anecdote, illustrative of railroad fidelity, is very pointed. A traveller inquired of a negro the distance to a certain point. "Dat pends on circumstances," replied the darkey; "if you gwine foot, it'll take you about a day; if you gwine in the stage or hominybus, you make it half a day; but you get in one of these smoke wagons, you be almost dar now."

## COLONIZATION.—Donations in the month of October in Vermont.—St. Albans, \$16.06

—Montpelier, \$30.00.—St. Johnsbury, \$132.36.—Peacham, \$11.50.—Danville, \$16.25; which with other small contributions from other towns, makes the amount received by the Society's agent the past month nearly \$250.00. A good beginning, in a good cause.

The last injunction sued out by the Passumpsic Railroad against the Boston, Concord and Montreal road, was dissolved by Judge Collier, last week.

The York Mirror says—"Daniel Webster's speeches, in six large volumes, are in great demand. The price is fifteen dollars; and we are happy to learn that three dollars on each set goes to the family of Mr. Webster."

The Lake Shore Railroad from Buffalo to Cleveland is completed, and two trains came through from Cleveland to Erie, on Wednesday.

The guano difficulty is reported to have been settled between Mr. Everett and the Peruvian Minister. The position that was assumed by Mr. Webster was receded from.

By the act relating to the collection and distribution of the school fund, which has received the Governor's signature, Middlebury College receives about \$1500, and Norwich University the same amount. The interest on the amount originally loaned the University of Vermont, (\$2000 in 1827) is remitted on payment merely of the principal.—Chronicle.

The Home Journal has this item:—"Theodore Parker and Daniel Webster—the living ass and the dead lion."

A general question was submitted to the people of New Hampshire, at the Presidential election, whether they were in favor of a law embracing the principle and provisions in substance of the Maine Law;—and that question the people decided in the negative by a small majority. The Judges of the Superior Court of New Hampshire have decided that in eight several details the liquor bill of the last June session of the Legislature conflicts with the Constitution.

If the poor house has any terrors for you, never buy what you don't need. Before you pay three cents for a jewelry, ascertain whether you can't make just as pleasant a noise by whistling.

## MEDICAL NEWS OF THE WILD CHERRY.

Ever since the settlement of America, Wild Cherry has been known to possess very important medicinal virtues. Every body knows this fact, but few know how to extract its essential properties. Another native Wild Cherry for other children for worms, for colic, and for almost every disease of children, and adults, are in the last of making a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the first stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the second stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the third stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the fourth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the fifth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the sixth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the seventh stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the eighth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the ninth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the tenth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the eleventh stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the twelfth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the thirteenth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the fourteenth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the fifteenth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

For the sixteenth stage of consumption, Asthma, no matter how long standing, or how violent, it is cured by the use of Wild Cherry bark, and other ingredients, in the form of a compound of syrup of Wild Cherry bark and other ingredients, to be used in spring as a cathartic to cleanse the system from the winter's accumulation of humors, and to be used in summer as a tonic to strengthen the system, and to be used in autumn as a purgative to cleanse the system from the summer's accumulation of humors.

## BRIGHTON MARKET, Nov. 18.

At market 2250 beef cattle, 1200 calves, 18 pairs working oxen, 125 cows and calves, 6000 sheep and lambs, 3700 swine.

Prices: Best Cattle—Extra \$6.50; 1st quality \$5.50; 2d quality \$4.50; 3d quality \$3.50.
